## BeeyLive: AI Assistant for Your Conferences

-  **Live subtitles for spoken content**  
BeeyLive captures everything said through the microphone in real time. Attendees can follow the live transcript on their phones; the full text is saved for future use, such as AI summaries.
-  **Inclusive events with AI accessibility**  
BeeyLive empowers participants with hearing impairments to follow the program in real time – directly on their mobile device.
-  **Real-time speech translation**  
For international audiences, BeeyLive auto-translates live subtitles into 30+ languages using cutting-edge language models.

## Where BeeyLive Makes an Impact

**Connect your mic**

**Launch the AI assistant**

**Share the QR code**

**Stream live subtitles**

### Conferences

Use AI to subtitle professional events and welcome global audiences.

### Public & Ceremonial Events

Make sure your message reaches everyone – including foreigners and people with hearing impairments.

### Press Conferences

Provide journalists with instant transcripts right after the event.

### Workshops & Trainings

Capture every spoken word – even off-script insights during breaks.

### Lectures

Help your audience follow terminology and navigate discussions with ease.
